Work Completed

Studied the Smart City Civic Complaint and Management System problem domain, discussed the proposed solution, and identified the major stakeholders and system workflow.

Prepared the project proposal covering the problem statement, proposed solution, technology stack, project scope, deliverables, evaluation criteria, scalability, risks, and future scope.

Outcome

The initial project proposal was prepared and the overall scope and workflow of the system were defined.

Next Planned Work

Complete Requirements Engineering and define the functional and non-functional requirements of the system.
